

Servo Motor Selection Manual

COMPANY PROFILE

CTB Co., Ltd. was established in 2008, focusing on the field of intelligent manufacturing, providing core components such as servo motors, torque motors, motorized spindles, and professional automation servo control solutions. The company has two wholly-owned subsidiaries, Beijing CTB technology Co., Ltd. (established in 2000) and Shandong CTB Intelligent Equipment Co., Ltd. (established in 2017).

The company is a national high-tech enterprise, a national specialized and innovative "little giant" enterprise, and a listed enterprise on the New Third Board. The company has been recognized as a "National Green Factory" and a "Smart Factory" in Beijing. It is a Beijing patent demonstration unit, a Beijing enterprise technology research and development institution, and a Beijing enterprise technology center.

The company's products include a full range of industrial automation products such as AC servo motors, AC servo drives, PLC, motion controllers, core functional components such as torque motors, motorized spindles, direct drive turntables. The core technology has reached the international advanced level, and key products can replace imported similar products, widely used in CNC machine tools, industrial robots, industrial automation and other fields.

The company has core technologies with independent intellectual property rights, over 300 patents and software copyrights, including more than 30 invention patents. Its servo control system technology is at the leading level in China, and it has mastered core technologies such as servo control space vector algorithm, control software development, servo drive design, servo motor electromagnetic design, and manufacturing processes.

The company has two intelligent equipment industrial parks in Beijing and Shandong, with a business area of 100000 square meters. Advanced equipment, strict management, sufficient production capacity, and strong production and supply capabilities. There are 30 offices nationwide, with a sales and service network covering the north and south of China, providing efficient and professional pre-sales, in sales, and after-sales services for our customers.

CONTENTS

Z18 Servo Spindle Motor	P 03
Z18B Servo Motor with Brake	P 12
Z18P Two Speed Servo Spindle Motor	P 21
Z18H Series High speed servo spindle motor	P 26
Z18L Through-Spindle Coolant Servo Spindle Motor	P 30
S18 Permanent Magnet Synchronous Servo Motor	P 34
S18B Series Universal servo motor	P 39
P18S series high response permanent magnet synchronous servo motor	P 43
HPM series low-speed high torque direct drive servo motor	P 49
PWM series high seismic permanent magnet synchronous servo motor	P 54
PDM Series Direct Drive Motors for Screw Presses	P 58
YH Series AC Asynchronous Servo Motors for Slides	P 61

Z18 Servo Spindle Motor

- ◆ Power range: 1.1 ~ 400kW
- ◆ Pole number: 4, 6, 8
- ◆ Max. speed: 8000r/min
- ◆ Encoder: Built-in (options: incremental, rotary, SinCos, absolute, single-turn absolute encoder)
- ◆ Cooling: Forced air cooling
- ◆ Duty type: Continuous (S1)
- ◆ Installation structure: B3(V5 V6)/B5(V1 V3)/B35(V15 V35)
- ◆ Noise: $\leq 70\text{dB(A)}$
- ◆ IP rating: IP55 (IEC40034-5)
- ◆ Dielectric strength: AC1800V
- ◆ Class of insulation: Class F
- ◆ Class of vibration: A
- ◆ Ambient temperature: -15 to 45°C
- ◆ Ambient humidity: <95%RH (non-condensing)

Product Features

- 1、Optimized structures of stator and rotor models.
- 2、Closed rotor slots reduce high harmonics and high-speed noise.
- 3、Absence of casing and built-in air path facilitate efficient heat radiation.
- 4、Integration of feet with body enhances resistance to vibration.
- 5、Built-in high precision magnetic encoder facilitates little speed fluctuation.
- 6、Maintenance-free built-in smart motor data card.

Industry Applications

Model Description (Take 7.5 kW spindle motor for example)

Code	Description	Instructions				Example Model
1	Product series	Z18: Code of the motor series				Z18 series spindle motor
2	Voltage rating	2: 200 V 4: 400 V				400 V
3	Power	See 'Standard Specifications'.				7.5 kW
4	Encoder	Code	Type of Encoder			Absolute encoder
		B	None			
		G	Incremental encoder	1024p	2500p 8192P	
		R	Rotary transformer	1024P		
		S	SinCos encoder	2048P		
		A	Absolute encoder	23bit		
		E	single-turn absolute encoder	17bit		
5	Frame code	Frame Code	Flange Size (L×W) mm	Frame Code	Flange Size (L×W) mm	Frame B
		A	175×175	E	320×320	
		B	205×205	F	380×380	
		C	265×265	G	480×480	
		D	300×300	H	580×580	
6	Basic speed	Code	Speed (rpm)	Code	Speed (rpm)	Basic speed : 1500 rpm
		05	500	30	3000	
		07	750	40	4000	
		10	1000	45	4500	
7	Speed at constant power	15	1500	60	6000	Speed at constant power: 6000 rpm
		20	2000	80	8000	
8	Max. speed	Code	Max. Speed (rpm)	Code	Max. Speed (rpm)	Max. speed : 8000 r/min
		LL	2500	H	8000	
		L	3000	HF	10000	
		LM	4500	F	12000	
		M	6000			
9	Mode of installation	3: Horizontal 5: Flange mounted 35: Horizontal + flange mounted				Flange mounted
10	Shaft extension	G: Bare shaft J: Splined shaft				Bare shaft
11	Smart card	A: with N: without				With smart card
12	Line incoming direction of junction box	2: Right incoming line of junction box 3: Left incoming line of junction box 5: Front line of junction box				Right incoming line of junction box
13	Incoming line of junction box	0: Standard junction box + black encoder plug 1: Standard junction box + aerospace encoder plug 2: Waterproof junction box + black encoder plug 3: Waterproof junction box + aerospace encoder plug				Standard junction box + black encoder plug
14	Export marking	O: Export motor (not for motors sold nationwide)				Export product
15	Code of nonstandard motor part	F1: Shaft extension F2: Flange F3: Feet	F4: Stator F5: Fan F6: Junction box	F7: Encoder F9: Other		Nonstandard shaft extension

Z18B Servo Motor With Brake

- ◆ Power range: 1.1 ~ 265kW
- ◆ Pole number: 4, 6, 8
- ◆ Max. speed: 3000r/min
- ◆ Encoder: Built-in (options: incremental, absolute)
- ◆ Cooling: Forced air cooling
- ◆ Duty type: Continuous (S1)
- ◆ Installation structure: B3(V5 V6)/B5(V1 V3)/B35(V15 V35)
- ◆ Noise: $\leq 70\text{dB(A)}$
- ◆ IP rating: IP55 (IEC60034-5)
- ◆ Dielectric strength: AC1800V
- ◆ Class of insulation: Class F
- ◆ Class of vibration: A
- ◆ Ambient temperature: -15 to 45°C
- ◆ Ambient humidity: <95%RH (non-condensing)

Product Features

- 1、Built-in brake.
- 2、Closed rotor slots reduce high harmonics and high-speed noise.
- 3、Closed rotor slots reduce high harmonics and high-speed noise.
- 4、Integration of feet with body enhances resistance to vibration.
- 5、Built-in high precision magnetic encoder facilitates little speed fluctuation.
- 6、Maintenance-free built-in smart motor data card.

Industry Applications

Model Description (Take 7.5 kW spindle motor for example)

Code	Description	Instructions				Example Model
1	Product series	Z18: Code of the motor series				Z18 series spindle motor
2	Voltage rating	2: 200V 4: 400V				400V
3	Power	See‘Standard Specifications’.				7.5kW
4	Encoder	Code B G A	Type of Encoder None Incremental encoder : 1024p 2500p 8192P Absolute encoder: 23bit			Incremental encoder
5	Frame code	Frame Code A B C D	Flange Size (L×W) mm 175×175 205×205 265×265 300×300	Frame Code E F G H	Flange Size (L×W) mm 320×320 380×380 480×480 580×580	Frame B
6	Basic speed	Code 05 07	Speed (rpm) 500 750	Code 20 30	Speed (rpm) 2000 3000	Basic speed: 1500r/min
7	Speed at constant power	10 15	1000 1500	40 45	4000 4500	Speed at constant power: 3000 r/min
8	Max. speed	Code LL L	Max.Speed (rpm) 2500 3000			Max. speed:: 3000r/min
9	Mode of installation	3: Horizontal 5: Flange mounted 35: Horizontal + flange mounted				Flange mounted
10	Shaft extension	G: Bare shaft J: Splined shaft				Bare shaft
11	Smart card	A: with N: without				With smart card
12	Line incoming direction of junction box	4: Right incoming line of junction box 5: Front line of junction box				Right incoming line of junction box
13	Incoming line of junction box	0: Standard junction box + black encoder plug 1: Standard junction box + aerospace encoder plug				Standard junction box + black encoder plug
14	Export marking	O: Export motor (not for motors sold nationwide)				Export product
15	Code of nonstandard motor part	F1: Shaft extension F2: Flange F3: Feet	F4: Stator F5: Fan F6: Junction box	F7: Encoder F9: Other	Nonstandard shaft extension

Z18P Two Speed Servo Spindle Motor

- ◆ Power range: 3.7 ~ 90kW
- ◆ Pole number: 4, 6, 8
- ◆ Max. speed: 12000r/min
- ◆ Encoder: Built-in (options: magnetic, incremental, rotary, SinCos, absolute)
- ◆ Cooling: Forced air cooling
- ◆ Class of vibration: A
- ◆ Duty type: continuous (S1)
- ◆ Installation structure: B3(V5 V6)/B5(V1 V3)/B35(V15 V35)
- ◆ Ambient temperature: -15 to 45°C
- ◆ Ambient humidity: <95%RH (non-condensing)

Product Features

- 1、Laminated yoke, small size, and high output torque;
- 2、Dual-winding electromagnetic design, high torque at low speeds, and rapid response at high speeds;
- 3、Wide speed range, high overload capacity, and high stability;
- 4、Substitute drive for two-stage gear reducers, little noise, and easy maintenance.

Industry Applications

Z18H Series High Speed Servo Spindle Motor

- ◆ Torque range: 7 ~ 52N.m, Overload factor 3-5 times
- ◆ Voltage rating: 400V
- ◆ Max. speed: 24000 r/min
- ◆ Class of insulation: Class F
- ◆ Ambient temperature: -15°C~+45°C
- ◆ Ambient humidity: <20%~90%RH (non-condensing)

Product Features

- 1、Laminated yoke, small size, and high output torque;
- 2、Low rotational inertia, and rapid response;
- 3、Wide range of operating speed (0-24000 rpm);
- 4、Output of rated torque even at zero speed;
- 5、High reliability, high stability, and high overload capacity;
- 6、Little vibration, and low noise.

Z18L Through-Spindle Coolant Servo Spindle Motor

- ◆ Torque range: 11.8 ~ 143.3N.m
- ◆ Voltage rating: 400V
- ◆ Max. speed: 12000 r/min
- ◆ Class of insulation: Class F
- ◆ Ambient temperature: -15°C~+45°C
- ◆ Ambient humidity: <20%~90%RH (non-condensing)
- ◆ Recommended minimum sealing pressure for different media for rotary joints:
Cutting fluid: pressure greater than 0.5Mpa, flow rate greater than 10L/min;
Oil mist: pressure greater than 0.2Mpa;
There will be leakage at the drainage outlet below the above pressure.

Product Features

1. Fully laminated magnetic yoke, small size and high power density.
2. Supports wide speed operation (0~12000rpm).
3. Low vibration and noise.
4. High Efficiency and overload capacity.
5. The flexible connection of the rotary joint ensures reliable operation and high lifespan.
6. The Rotary Joint support operation without water/oil mist (dry running).

For installation and usage precautions, please refer to the "User Installation Manual for Z18L Through-Spindle Coolant Servo Spindle Motor"

S18 Permanent Magnet Synchronous Servo Motor

- ◆ Torque range: 6 ~ 56N.m
- ◆ Speed sensor: built-in absolute encoder, etc.
- ◆ Rated speed: 1500 ~ 3000rpm
- ◆ Voltage rating: 400V

Product Features

- 1、 Built-in high precision absolute encoder for better positioning accuracy and operational stability at low speed; high precision and high dynamic response control.
- 2、 New magnetic field analysis and motor manufacturing technologies reduce torque ripples, thus improving speed stability and reducing torque ripples of the servo system.
- 3、 New stator lamination and splicing technology reduces temperature rise and improves electromagnetic performance of the motors, thus improving their efficiency and reliability.

Industry Applications

Model Description (Take 10N.m motor for example)

Code	Description	Instructions	Example Model
1	Product series	S18: manufacturer's motor code	S18 series permanent magnet synchronous servo motor
2	Frame code	Flange size: 130×130、180×180	130×130
3	Voltage rating	4: 400V	400V
4	Torque	See 'Standard Specifications'.	10N·m
5	Type of encoder	Code Type of Encoder B None A Absolute encoder	Built-in absolute encoder
6	Basic speed	Code Speed (rpm) 15 1500 20 2000 25 2500 30 3000	Basic speed: 3000 rpm
7	Max. speed		Max. speed: 3000 rpm
8	Mode of installation	5: Flange mounted	B5 flange mounted
9	Shaft extension	G: Bare shaft J: Shaft with standard key slots	Bare shaft
10	Brake	B: Electromagnetic power-off brake	Brake

S18B Series Universal Servo Motor

- ◆ Torque range: 6 ~ 56N.m
- ◆ Speed sensor: built-in absolute encoder, etc.
- ◆ Rated speed: 1500 ~ 3000rpm
- ◆ Voltage rating: 400V

Product Features

- 1、 Built-in high precision absolute encoder for better positioning accuracy and operational stability at low speed; high precision and high dynamic response control.
- 2、 New magnetic field analysis and motor manufacturing technologies reduce torque ripples, thus improving speed stability and reducing torque ripples of the servo system.
- 3、 New stator lamination and splicing technology reduces temperature rise and improves electromagnetic performance of the motors, thus improving their efficiency and reliability.

P18S Series High Response Permanent Magnet Synchronous Servo Motor

- ◆ Power range: 5.5~450kW
- ◆ Duty type: continuous (S1)
- ◆ Max. speed: 6000 r/min
- ◆ Encoder: built-in (options: magnetic, incremental, rotary, SinCos, absolute)
- ◆ Heat radiation: forced air cooling
- ◆ Installation structure: B3(V5 V6)/B5(V1 V3)/B35(V15 V35)
- ◆ IP rating: IP55 (IEC60034-5)
- ◆ Class of vibration: A
- ◆ Noise: ≤ 70 dB(A)
- ◆ Class of insulation: Class F
- ◆ Ambient temperature: $-15^{\circ}\text{C} \sim +45^{\circ}\text{C}$
- ◆ Ambient humidity: $<20\% \sim 90\% \text{RH}$ (non-condensing)

Product Features

- 1、Rich product variety: covering 6 machine base sizes, over 100 models, and can also be customized to meet customers' different usage scenarios.
- 2、High efficiency and wide high-efficiency zone: Special magnetic and thermal circuit designs not only result in low losses but also high heat dissipation efficiency.
- 3、High power density: High performance magnetic steel and silicon steel sheets achieve small size and high performance of the motor.
- 4、Wide speed range: adopting an embedded rotor structure, with strong weak magnetic expansion ability.
- 5、High dynamic response: The motor overload capacity can reach more than 3 times, and it has a small moment of inertia, achieving high dynamic response of the motor.
- 6、Smooth operation: Special pole slot coordination and winding form achieve weak tooth slot torque and small torque ripple.
- 7、Strong anti demagnetization ability: using high-performance neodymium iron boron material and anti demagnetization magnetic circuit design.
- 8、High reliability: The motor adopts high-performance effective materials and insulation materials to ensure the service life of the motor.

Industry Applications

Model Description (Take 15 kW, 1500 rpm motor for example)

P18S - 4 015 A B 15 - 30 5 G - A 5 0 B O - F1

1 2 3 4 5 6 7 8 9 10 11 12 13 14 15

Code	Description	Instructions	Example Model
1	Product series	P18S: code of the motor series	P18S Series synchronous Servo Motors
2	Voltage rating	2: 200V 4: 400V	400V
3	Power code	See 'Standard Specifications'.	15kW
4	Type of encoder	Code Type of encoder B None C Magnetic encode 128T、256T G Incremental encoder 1024p、2500p、8192P R Rotary transformer 1024P S SinCos encoder 2048P A Absolute encoder 23bit	Absolute encoder 23bit
5	Frame code	Code Flange Size (L×W) mm Code Flange Size (L×W) mm B 205×205 F 380×380 C 265×265 G 480×480 E 320×320 H 580×580	Frame B
6	Basic speed	Code Speed r/min Code Speed r/min 05 500 30 3000 07 750 40 4000	Basic speed: 1500 rpm
7	Speed at constant power	10 1000 45 4500 15 1500 60 6000 20 2000	Speed at constant power: 3000 rpm
8	Mode of installation	3: Horizontal 5: Flange mounted 35: Horizontal + flange mounted	Flange mounted
9	Shaft extension	G: Bare shaf J: Splined shaft	Bare shaft
10	Smart card	A: with N: without	With smart card
11	Line incoming direction of junction box	2: Right incoming line of junction box 3: Left incoming line of junction box 5: Front line of junction box	Front line of junction box
12	Incoming line of junction box	0: Standard junction box + black encoder plug 1: Standard junction box + aerospace encoder plug 2: Waterproof junction box + black encoder plug 3: Waterproof junction box + aerospace encoder plug	Standard junction box + black encoder plug
13	Brake	B: With brake (not for motors without brake)	With brake
14	Export marking	O: Export motor (not for motors sold nationwide)	Export product
15	Code of nonstandard motor part	F1: Shaft extension F4: Stator F7: Encoder F2: Flange F5: Fan F3: Feet F6: Junction box	Nonstandard shaft extension

HPM Series Low-speed High Torque Direct Drive Servo Motor

- ◆ Power range: 30~251kW
- ◆ Max. speed: 1000 r/min
- ◆ Encoder: built-in (Absolute encoder 17bit)
- ◆ Heat radiation: forced air cooling
- ◆ Duty type: continuous (S6)
- ◆ Installation structure: B5(V1 V3)
- ◆ IP rating: IP55 (IEC60034-5)
- ◆ Dielectric strength: AC1800V
- ◆ Class of insulation: Class F
- ◆ Class of vibration: A
- ◆ Ambient temperature: -15 to 45 °C
- ◆ Ambient humidity: <20%~90%RH (non-condensing)

Motor Internal Structure

Product Features

- 1、 Strong overload: With IPM structural design, the overload capacity can reach 3 times, the low-speed and high torque characteristics can maximize the effect of curve modes such as punch pendulum.
- 2、 Electromagnetic design: Optimize electromagnetic design without the need for AFE (Active Front End Unit).
- 3、 Strong seismic resistance: Unique encoder seismic structural design, with a seismic rating of up to 5G.
- 4、 High precision: standard 17bit absolute value encoder, high precision.
- 5、 Torque range: 2500N. m~35000N. m, a total of 21 specifications, covering the needs of 45-2000T servo press machines.
- 6、 Holding brake device: a full series of holding brake design, avoiding complex installation problems of mechanical holding brakes.
- 7、 Maintenance free: The motor adopts an air-cooled design, completely avoiding the risk of condensation and scale in the water-cooled motor.

Industry Applications

Model Description

Code	Description	Instructions	Example Model
1	Product series	HPM: code of the motor series	HPM series synchronous servo motors
2	Frame Code	4: 480 6: 680 8: 880	4: 480
3	Voltage rating	4: 400V	400V
4	Code of torque	K: Thousands W: Tens of thousands (peak torque)	Peak torque: 6000 N·m
5	Motor cooling	F: Forced air cooling W: Water cooling N: Natural cooling	Forced air cooling
6	Encoder	B: None A: 23 bit absolute encoder	Absolute encoder
7	Rated speed	500: 500r/min	Rated speed: 500 rpm
8	Max. speed	800: 800r/min	Max. speed: 800 rpm
9	Shaft extension	G: Bare shaft J: With standard key slots C: Gear shaft	Gear shaft
10	Mode of installation	5: B5/flange mounted 35: B35/horizontal + flange mounted	B5 flange mounted
11	Brake	B: With brake	With brake

PWM Series High Seismic Permanent Magnet Synchronous Servo Motor

- ◆ Power range: 45~280kW
- ◆ Duty type: S1
- ◆ Center height: 280, 315
- ◆ Cooling: IC418
- ◆ Speed: 600rpm~2000rpm
- ◆ Encoder: built-in(rotary transformer/high precision magnetic encoder)
- ◆ Installation structure: B3(V5 V6)/B5(V1 V3)
- ◆ IP rating: IP54
- ◆ Class of insulation: Class F
- ◆ Class of vibration: A
- ◆ Ambient temperature: -15 to 45 °C
- ◆ Ambient humidity: <20%~90%RH (non-condensing)

Motor Internal Structure

Product Features

- 1、Strong vibration resistance: Motor base is welded with steel plates, and the end cover is made of cast steel parts. The shaft diameter is increased and the material is quenched and tempered with 42CrMo. Independent anti vibration fan for heat dissipation.
 - 2、Special design: C-shaped lifting hole at the shaft end. 3 anchor installation holes with enlarged aperture; Install lifting rings on both sides of the base. 315 and 355 frames adopt double key slots.
 - 3、Strong versatility: Reduce the size by 1-2 machine bases compared to conventional motors, which can be directly replaced.
 - 4、Superior performance: Adopting an embedded structural design. Unique slot fit of stator and rotor ensures less pulsation, low noise, low vibration.
 - 6、High reliability: reduced current. Temperature rise decreases. Improving motor life.
- Accurate control: effectively preventing deceleration overshoot and reducing damage to the belt/reducer. Good consistency of itinerary. Good product consistency. Energy accuracy can reach within 0.5%.
- 7、Significant advantages: smaller moment of inertia. Higher starting torque. Wider weak magnetic region. Wider speed regulation zone. Less speed fluctuation. Power density and torque density increased by 30% compared to conventional motors.
 - 8、Energy saving and efficient: using high-efficiency rare earth permanent magnet materials, the motor efficiency reaches IE4 or above.

Industry Applications

Model Description (Take 110 kW, 750 rpm motor for example)

PDM Series Direct Drive Motors for Screw Presses

PDM series built-in torque motors consist of a stator, and a permanent magnet rotor with hollow shaft. They are liquid cooled. The stator is fixed on the body, and the rotor connected to the rotary mechanism. It forms an integral direct drive unit when combined with such feedback elements as encoder and properly matched with a drive. The design of a built-in rotor effectively prevents vibration.

- ◆ Torque range: $4050\text{N}\cdot\text{m} \sim 27000\text{N}\cdot\text{m}$
- ◆ Max. speed: 200 rpm
- ◆ Encoder: optional (rotary transformer/high precision magnetic encoder)
- ◆ Heat radiation: water cooling
- ◆ Duty type: continuous (S1)
- ◆ IP rating: IP23 (split structure)
- ◆ Dielectric strength: 1,800 VAC
- ◆ Class of insulation: Class F
- ◆ Ambient temperature: -15 to $45\text{ }^{\circ}\text{C}$
- ◆ Ambient humidity: $<20\% \sim 90\%\text{RH}$ (non-condensing)

Motor Internal Structure

Product Features

- 1、High torque, high drive rigidity.
- 2、No gear clearance, no wear, long life, and stable accuracy.
- 3、Built-in design for more compact equipment structure.
- 4、Hollow shaft of rotor with a big bore facilitates installation and commissioning.
- 5、Small size, light weight.

Industry Applications

Model Description

PDM - 830 4 9K0 W B 150 / 200 K 5 - A

1 2 3 4 5 6 7 8 9 10 11

Code	Description	Instructions	Example Model
1	Product series	PDM: code of the motor series	PDM series motor
2	Frame code	830, 1,400	830 frame
3	Voltage rating	4: 400 V	400 V
4	Code of torque	K: Thousands W: Tens of thousands (peak torque)	Peak torque: 9,000 Nm
5	Motor cooling	W: Water cooling N: Natural cooling	Water cooling
6	Encoder	B: NONE R: Rotary transformer C: Magnetic encoder	NONE
7	Rated speed	Actual motor speed, in: rpm	Rated speed: 150 rpm
8	Max. speed	Actual motor speed, in: rpm	Max. speed: 200 rpm
9	Shaft extension	K: Hollow shaft	Hollow shaft
10	Mode of installation	5: B5/flange mounted	B5/flange mounted
11	Smart card	A: With smart card (not for motors without smart card)	With smart card

YH Series AC Asynchronous Servo Motors for Slides

- ◆ Power range: 0.7-5.5 kW
- ◆ Pole number: 8
- ◆ Max. speed: 3,000 rpm
- ◆ Encoder: built-in (rotary transformer)
- ◆ Installation structure: B5
- ◆ IP rating: IP55 (IEC 60034-5)
- ◆ Noise: ≤ 70 dB(A)
- ◆ Dielectric strength: 1,800 VAC
- ◆ Class of insulation: Class F
- ◆ Class of vibration: A
- ◆ Ambient temperature: -15 to 45 °C
- ◆ Ambient humidity: <20%~90%RH (non-condensing)

Product Features

- 1、Reduced Mounting Space
- 2、Easy Maintenance
- 3、Pneumatic Brake Design with High Stability and Reliability

Industry Applications
